

# Changing Languages

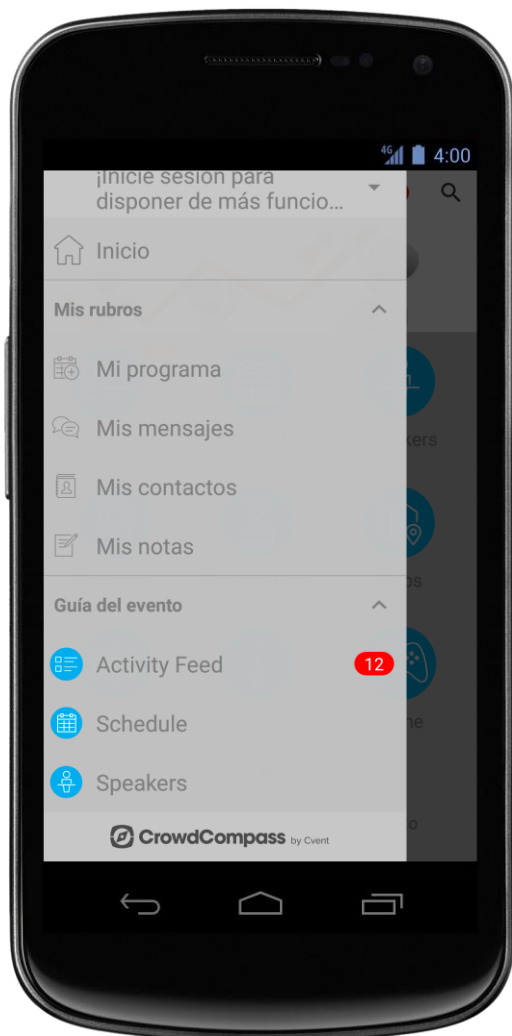

## How to Do It

**On iOS.** From your device's home screen, tap Settings, then General, select Language & Region.

Tap iPhone Language and choose your preferred language from the list.

**On Android.** Swipe down on the home screen, then click the gear in the top right. Search for the language setting. Tap Language and Input, then Language.

Choose your preferred language from the list. Once you do, text within the app will change as well.

## Common Questions

**Which languages are supported?** CrowdCompass supports English, French, Dutch, German, Italian, Spanish, Swedish and both Continental and Brazilian Portuguese.

**Why do I still see text in English?** All hard-coded text and pop up messages will display in the language that you have chosen on your device.

Text that is customizable by the planner, like navigation icons and push notifications, will display in the language of the planner's choosing.
