

# Build Your Profile

## Build Your Profile

1. Access your profile settings. After logging in, tap the  profile icon in the bottom right and then tap your name at the top of the screen.
2. Tell us about you. Upload an image, choose your privacy settings, connect any relevant social media accounts, and fill out the text fields to give other attendees a sense of who you are.

## Take it Public

1. Access your profile settings. If you would like fellow attendees to see your profile, you can set it to public. If not, you can set it to private – please note that when a profile is private, your networking opportunities may be limited.

After logging in, tap the  Profile icon on the bottom right. Next, tap your name at the top of the screen.

2. Uncheck the box. At the top of your Profile Settings, make sure that the box marked "Set Profile to Private" is **Green**. This means the profile is public.
